

The world's most scalable, upgradeable and fully integrated bowling center management system

Your management system is the heart of your business. While many systems look similar at first, in-depth comparison reveals real differences. Make the comparison yourself. Imagine critical situations and challenge each system to solve them. What if the center is crowded, if an employee tries to steal money, if a new employee needs training, if you need things to run a certain way but you're not there? Successful proprietors understand these scenarios; and that choosing the right system can make tough situations easier to handle. That's why, in growing numbers, they choose Conqueror Pro.

Control Every Aspect Of Your Business

From customized setup to remote center management, from pricing to security, from lanes to employees, Conqueror Pro makes it easy to keep tabs on things and call the shots.

That includes taking every opportunity to make a great impression on customers. With such features as Frequent Bowler Tracker and Web Reservations, Conqueror Pro helps you establish and build stronger relationships and repeat business.

Conqueror Pro helps you put customer service and satisfaction first. As one system throughout your center, Conqueror Pro makes everything run better. Transactions are seamless. POS sales are quick. Waiting customers stay informed. And employees jobs are made easier.

Conqueror Remote

Manage The Way You Want To Manage, Even When You're Not There

With any internet connection anywhere, your laptop becomes an additional bowling center workstation. You can operate exactly as you would in your center, using whatever Conqueror Pro functions you want, including setting prices and options, solving technical problems, booking lanes, defining leagues, checking income, and more.

Real-Time Cameras Show What's Happening As It's Happening

With integrated real-time cameras you can pan from side to side and zoom in and out, seeing your staff and center at work.

Real-Time Income Monitoring

See income figures real-time at the bottom of the screen while viewing your center and performing other Conqueror Pro functions.

Automatic Internet Updates

Stay On The Cutting-Edge

We continuously improve and enrich our systems, and thanks to our industry-first and unique Internet update feature, your center is always cutting-edge.

Conqueror Pro automatically downloads the latest software version for your center as soon as we make it available online. You choose when the upgrade should be performed and every component of your system - Conqueror Pro, Scoring, TCS, MMS and more - gets updated automatically.

Before authorizing the upgrade, you can click on the Conqueror Feature File to fully understand what has been added to the new version and what improvements have been made.

Electronic Booking System Advanced Reservations

Totally Integrated

Open play, leagues, time-games, FBT, and POS are all integrated with the Conqueror Pro Booking System. Center rules, like lane options, bowling modes, prices, lane and time game setup, and more – also integrate seamlessly with Conqueror Pro.

Real-Time Interaction With Lanes

Conqueror Pro knows how fast bowlers are playing and estimates game duration on each lane. As a result, you can manage time-bookings and walk-ins simultaneously, an advantage other booking systems don't offer.

Quick Or Detailed Booking

Use drag and drop or default settings for fast booking insertion; and accurate booking definition, when needed.

Complete, Flexible Bookings Management

Manage deposits, payments, food and beverage ordering, and lane and bowler options. Convert game reservations to time reservations or vice versa during the check in to exploit your lanes and maximize their occupancy rates.

Mixed And Recurring Bookings

Easily handle a customer who books multiple services, such as bowling, a restaurant table, and billiards, for six weeks on a given day each week. Use league software to book a group of lanes every week automatically.

Overbooking Area

Manage quick lane arrangements and late arrivals in a snap.

Time Games Module

Conqueror Pro gives you the ability to seamlessly manage all of the time-based revenue sources within your center including billiards, table tennis, party room, and much more.

Quick Setup

Every time-based resource can be easily defined.

Integration With Game Control Devices

Control billiard lights or other automated devices with ease.

Same Layout And Behavior

Time games look and work the same as the corresponding lane management modules; and have nearly the same functionalities, including booking system, frequent bowlers and POS.

Online Booking Web Reservations

Almost all industries – from hotels to travel, from cinemas to restaurants – offer online reservations. Consumers expect it. Now your bowling center can offer online reservations, too.

With the Web Reservations module, you simply add a Book Online link to your website. Customers can then book lanes and packages with a few keystrokes from home or work. Only QubicaAMF Web Reservations fully integrates with lane management and POS.

Easily Integrates With Your Website

Customize colors, font and logo to match your website's look and feel, add a Reservations link, and start accepting online reservations immediately.

Offer Online Promotions

Offer online promotions, such as bowling only, bowling plus F&B, birthday parties, corporate parties, all organized by categories with pictures. Also include open menu choices with your packages.

Shopping Cart

An intuitive way for your customers to shop around and to book their games online.

Credit Card Payment And Deposits

Set the deposit amount required to confirm lane reservations, charge the whole price in advance, or charge customers upon arrival.

Flexible Setup

Decide when online bookings are allowed day by day, how far in advance soon customers have to book their experience, which lanes are reserved for web booking, set additional booking fees, properly manage split houses and assure that groups are assigned to adjacent lanes and much more.

Online Sign-In And FBT Account Status

Customers can sign into your frequent bowler program and check their account status, including the money/points balance on their card.

Real-Time Integration With Booking, Lane Availability, Price Key Setup

Avoids double booking and manual reconciliation of telephone and web bookings. Packages, lane availability and prices appear online for web reservations.

Dynamic Promotions

Drive Business The Days And Times You Want

Influence Customer Habits

Attract customers to days and times they haven't considered before; to book more days in advance; to increase the bookings to walk-ins ratio via web-only promotions linked to lane availability.

Increase Customer Visits

Increase visits, spread visits throughout the week, and have more lanes for walk-ins during peak periods.

Define Dynamic Discounts

Have discounts vary in real-time based on lane availability, such as offering a 30% discount when customers book in the mornings, at least two weeks in advance, when 20% or less of lanes are booked.

Add Premium Pricing

When lanes are booking fast, have customers pay for the privilege of reserving a lane reservation.

Combine Google™ Analytics With Dynamic Promotions.

QubicaAMF Web Reservations Dynamic Promotions module integrates with Google™ Analytics (<http://www.google.com/analytics/>) to show clearly how your web business is performing.

Plug-And-Play Internet Gateway

The Internet Gateway provides a plug-and-play solution that can prevent an uncontrolled access to the Internet from Conqueror Pro terminals and allows a secure access for

- QubicaAMF staff to effectively provide remote technical support
- Internet-based services (e.g. Web Reservations, Facebook GameConnect)
- Remote Conqueror terminal connections

League & Tournament Management

Advanced Setup And Play Options
Provides unmatched flexibility and user friendliness.

Complete Interface To CDE BLS Software
The interface includes league import-export features allowing you to easily manage your leagues in BLS and seamlessly run them from Conqueror Pro.

Automatic Lane Movement
If some of the lanes are still busy, the team and league information is automatically sent to those lanes when the previous bowlers finish.

Tournaments and Other Competitions Made Simpler

Tournaments And Swedish Leagues
Integrated tournament and Swedish league modules.

Casual Competitions
Make rapid standing sheets by selecting a group of lanes in open play.

Scrolling Standings
Standing results display on the overhead monitor as a scrolling message.

Tournament Events Programming
Integrated tournament system programs all of events, teams and squads.

Lockers

Integrated
Manage locker use in full integration with the frequent bowler system and POS.

User-Friendly
Graphical interface shows easy-to-understand layout of locker banks.

Complete
Management of monthly and yearly payments, reports, locker maintenance, waiting list, and more.

Interfaced Applications

Automatic Shift Report Export To Accounting System

Shift reports automatically export to QuickBooks and into the proper account setup. Each figure generated by Conqueror Pro flows.

Dassle®

The optional Dassle® advanced accounting interface functions allow setup and re-map into QuickBooks account numbers; and reconciliation/merge of shift report incomes of Conqueror Pro.

Integration With Berg Liquor Dispenser

This interface enables control of liquor being served from the Conqueror Pro POS module. Liquor must be selected before being poured, ensuring that liquor served is then sold (or voided, but still tracked).

Integration With Third Party Systems

Hopewiser (UK only), Rec Trac, R-Keeper (Russia only), Favero, WinTic (Italy only), CleanCash (Sweden only) and others.

Integration With The Most Popular Cashless Systems

Allows management of payments using pre-loaded cards that work with other systems. Conqueror Pro interfaces with: InterCard, Embed, CoinTech and Sacoa.

CDE, BowlerTRAC And Other Open Architecture Formats

Bowling center data can also be exported to Excel and other popular file formats.

Interface with Micros POS

Provides a connection to the popular Micros POS system offering a powerful combination of Conqueror Pro for bowling management and Micros for all financial activity and payments.
