

Disinfecting Highway66 Mini Bowling Equipment

Disinfecting Your Bowling Center Equipment

With many people coming through your doors, it is essential to provide a hygienic environment for your staff and customers. In considering your bowling equipment and technology, QubicaAMF's goal is to provide the most up-to-date best practices and techniques to keep your facility clean and maintain the longevity of your equipment. We highly recommend taking the time to focus on the areas you're your customers come into contact with and make sure you keep up with the latest CDC standards for all areas of your business.

We recommend the following general guidelines for disinfecting your Highway66 Mini Bowling equipment:

- **Always power off all electronic equipment** before cleaning.
- **Avoid plugs, wires, receptacle locations** and any areas that could allow liquids to get in during cleaning and disinfecting.
- **Wear disposable gloves** when cleaning and disinfecting surfaces. Discard after each cleaning. Clean your hands immediately after gloves are removed and disposed.
- Unless specifically instructed, **avoid using any of the following chemicals** or products containing these chemicals as they will cause permanent damage to some product surfaces:
 - Any chlorine-based cleaner, such as bleach
 - Peroxides (including hydrogen peroxide)
 - Solvents such as Acetone, paint thinner, Benzene, Methylene Chloride or Toluene
 - Ammonia-based products (like many glass cleaners)
 - Ethyl Alcohol

Disinfecting Highway66 Mini Bowling Ball Return, Ball Rack and Payment console with joystick and button controls:

Wipe each surface with a microfiber cloth moistened with a mixture of 70% Isopropyl Alcohol solution or use a disinfecting wipe. The cloth should be damp, but not dripping wet. Air-dry and wipe with a fresh microfiber cloth.

Disinfecting Highway66 Mini Bowling Balls

- When cleaning or sanitizing bowling balls inspect the entire ball for cracks as it could cause damage over time to your ball return or lanes. Either correct the problems or take the bowling balls out of service.
- To clean the bowling ball, wipe entire surface and fingers holes with a microfiber cloth moistened with a 70% Isopropyl Alcohol solution before the next use. The cloth should be damp, but not dripping wet. Allow the solution to sit on the ball for 5 minutes before wiping

off. Alternately, quaternary ammonium-based solutions may be used. Examples that meet the relevant SDS description can be used (examples include: [Air X 78 Disinfectant](#), [Air X Spray-N-Go](#), [Quato44](#) and [NI-712 Disinfecting Cleaning Concentrate](#)). CAUTION: DO NOT saturate the ball. Quaternary ammonium-based disinfecting products have not been tested for long-term exposure and effect on the life of our products.

- Air-dry and wipe with a fresh microfiber cloth.

Additional Items for Customers Operating Highway66 with BES X Dual Mode

Disinfecting Your SuperTouch Console:

DO the following:

1. Power off the Highway66 units by shutting off at the circuit breakers.
2. Wipe the surface of the console or keypad with a microfiber cloth moistened with a 70 % Isopropyl Alcohol solution or use a disinfecting wipe. The cloth should be damp, but not dripping wet.
3. Dry the surfaces with a fresh microfiber cloth.
4. Power on the pair of lanes when cleaning is finished.

DO NOT:

- a. **Spray water, detergent or any liquid directly on the product.**
- b. **Allow liquids to get inside the unit as this may cause damage.**
- c. **Excessively wipe or use a material other than a microfiber cloth. This could potentially lead to damaging console surfaces.**

Disinfecting your Conqueror PCs, LCD Monitors or Touchscreens, Keyboards & Mice:

DO the following:

1. Turn off the device you plan to clean and disconnect AC power. It is not advisable to clean a product while it is powered on or plugged in.
2. Wipe each surface with a microfiber cloth moistened with a mixture of 70 % Isopropyl Alcohol solution. The cloth should be damp, but not dripping wet.
3. Gently wipe the moistened cloth on the surfaces to be cleaned.
4. When cleaning a monitor, carefully wipe in one direction, moving from the top of the display to the bottom.
5. Surfaces must be completely air-dried before turning the device on after cleaning. No moisture should be visible on the surfaces of the product before it is powered on or plugged in.

DO NOT:

- a. **Spray water, detergent or any liquid directly on the product.**
- b. **Allow liquids to get inside the unit as this may cause damage.**
- c. **Excessively wipe or use a material other than a microfiber cloth. This could potentially lead to damaging console surfaces.**

Disinfecting Upholstered Surfaces of Infinity Sofas & Synergy Sofa Benches:

Disinfect the soiled area with **up to a 10% solution of household bleach** and water solution or use a disinfecting wipe. It is very important to **rinse the cleaned area with fresh water after applying the bleach**.

NEVER use non-diluted bleach on the furniture upholstery.

In view of the current COVID-19 situation, we suggest that the above cleaning and disinfecting procedures be completed often and with special focus on the most frequently touched surfaces and equipment in your center.
