

EDGE

FREE FALL

BRILLIANT PINSPOTTING TECHNOLOGY
THAT SIMPLIFIES THE BOWLING YOU LOVE

Model 82-30
Our first production pinsetter

BORN OF AN UNMATCHED LEGACY

Our journey began in 1946 when we introduced the first automatic pinsetter, a revolutionary approach that powered the large-scale growth of bowling. Since then, more operators and investors have chosen our machines, and we have shipped over 125 thousand pinsetters worldwide.

Today, we are proud to introduce the **EDGE Free-Fall Pinsetter**. The latest expression of our never-ending commitment to make bowling more amazing than ever.

WHY WE CREATED EDGE FREE-FALL

Automatic free-fall pinspotting technology has been a cornerstone of bowling's heritage for over 70 years. Yet times have changed, the game and business have evolved, and players have become more discerning.

More than ever bowling operators and investors need equipment that is easier to maintain, less costly to operate and incredibly dependable. When it comes to free-fall pinspotting equipment, older, secondhand and even some new machines simply aren't up to the task. But QubicaAMF is.

BRILLIANT PINSPOTTING TECHNOLOGY
THAT SIMPLIFIES THE BOWLING YOU LOVE

BRILLIANT PINSPOTTING TECHNOLOGY
THAT SIMPLIFIES THE BOWLING YOU LOVE

Representing over seven decades of QubicaAMF research, development, refinement, and sheer know-how, EDGE Free-Fall truly stands as the pinnacle of free-fall pinspotter innovation.

Only EDGE Free-Fall is:

- ✓ The best performing in real-world operations
- ✓ The easiest to learn and maintain
- ✓ The smartest investment long-term

Ready to see how this machine can help take your center to the cutting edge—and beyond?

EDGE FREE-FALL

best performing in real-world operations

EDGE Free-Fall is the performance leader where it counts: in real-world bowling centers, real-world conditions, day in and day out. This means an amazing experience for your guests, unmatched by any other free-fall machine.

Features & Advantages:

- ✓ EDGE Pin Handling Technology
- ✓ Best Pin Pick-Up Range
- ✓ Gripper Ball Return System
- ✓ CenterPunch LED Pin Lighting
- ✓ Fastest Gameplay

EDGE FREE-FALL

best performing in real-world operations

EDGE PIN HANDLING TECHNOLOGY

Bowling's most efficient pin handling system is the heart of this machine's industry-best performance. It spots and re-spots pins with amazing reliability and precision.

BEST PIN PICK-UP RANGE

EDGE Free-Fall has bowling's largest pin pick-up range. This means more standing pins that slide off-spot get picked up and re-spotted by the machine for fewer interruptions in play.

GRIPPER BALL RETURN SYSTEM

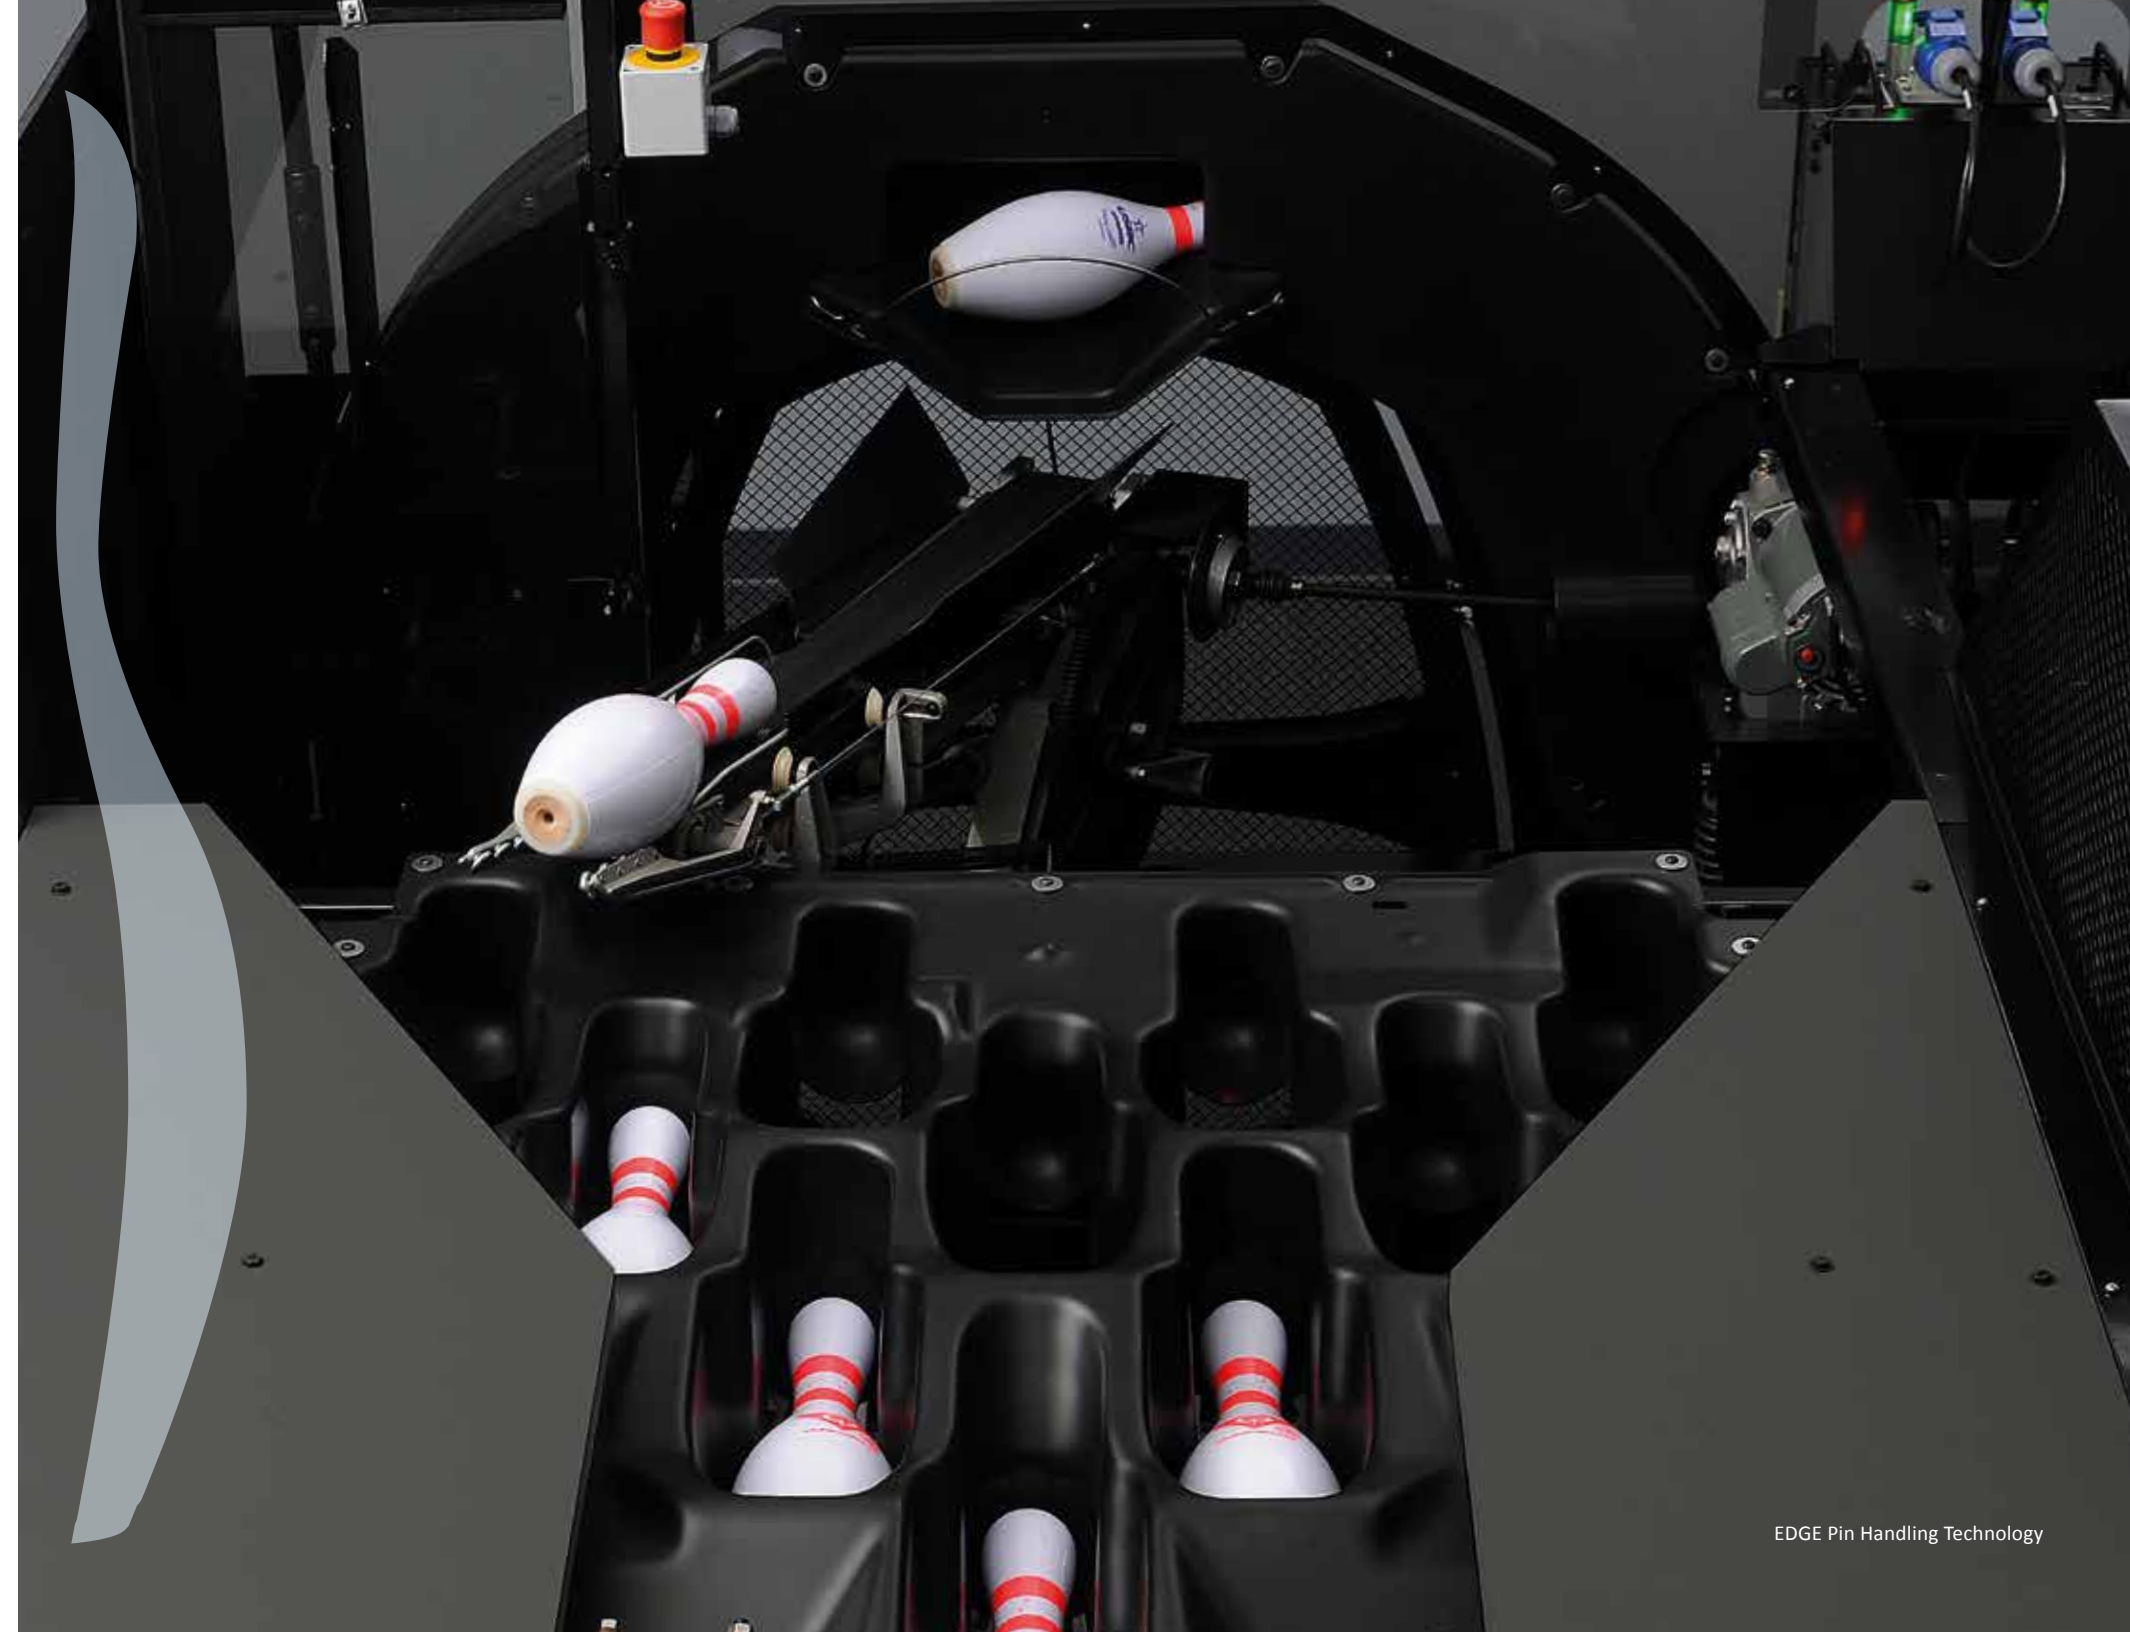

Not only returns balls quickly and reliably, its ball-wiper removes excess lane oil from the ball at the same time.

CENTERPUNCH LED PIN LIGHTING

Turns ordinary play into an extraordinary experience by illuminating pins with endless colors and dynamic effects. Effects react to on-lane events like strikes, spares and gutter balls. It's a real wow factor!

FASTEST GAMEPLAY

EDGE Free-Fall is the industry's fastest cycling machine on average. League players appreciate the faster pace and ability to finish sooner. And there is more throughput for open-play guests during peak periods.

EDGE FREE-FALL

easiest to learn and maintain

Through a combination of innovation and smart design, EDGE Free-Fall can be serviced by technicians who are new to bowling, or those with years of industry experience. This means more flexibility when it comes to finding staff for your center.

Features & Advantages:

- ✓ Tech Wizard Guidance
- ✓ XLi Technology
- ✓ Safety in its DNA
- ✓ Staff-Friendly Accessibility
- ✓ Real-Time Performance Monitoring

EDGE FREE-FALL easiest to learn and maintain

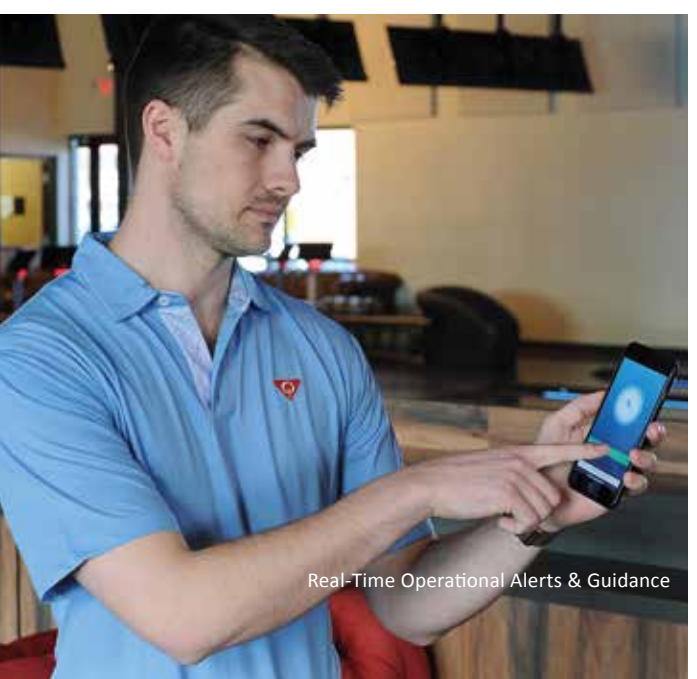

Tech Wizard Guidance

This industry-first expert smartphone app saves time and money by making operation and servicing easier and more efficient, especially for technicians new to bowling.

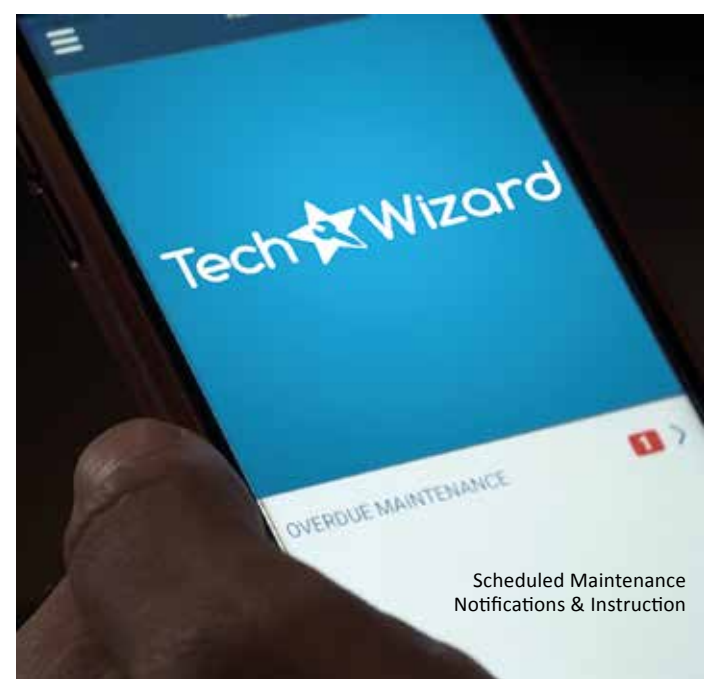

Tech Wizard¹ does this through:

- ✓ Real-time operational alerts and guidance
- ✓ Scheduled maintenance notifications and instruction
- ✓ A convenient “how-to” video library resource for technicians

¹ Functionality requires Conqueror X, any tier, with Conqueror Maximization Program (CMP).

Real-Time Operational Alerts & Guidance

Scheduled Maintenance Notifications & Instruction

“How-To” Video Library

EDGE FREE-FALL

easiest to learn and maintain

XLI TECHNOLOGY

XLi software-driven technology eliminates mechanical complexity and simplifies machine operation. And the XLi software is always current thanks to the BES X and Conqueror X scoring and management systems.

SAFETY IN ITS DNA¹

Delivers peace of mind. Industry-leading reliability means fewer staff interactions with the machines. Transparent guarding provides visibility without requiring deeper access.

STAFF-FRIENDLY ACCESSIBILITY

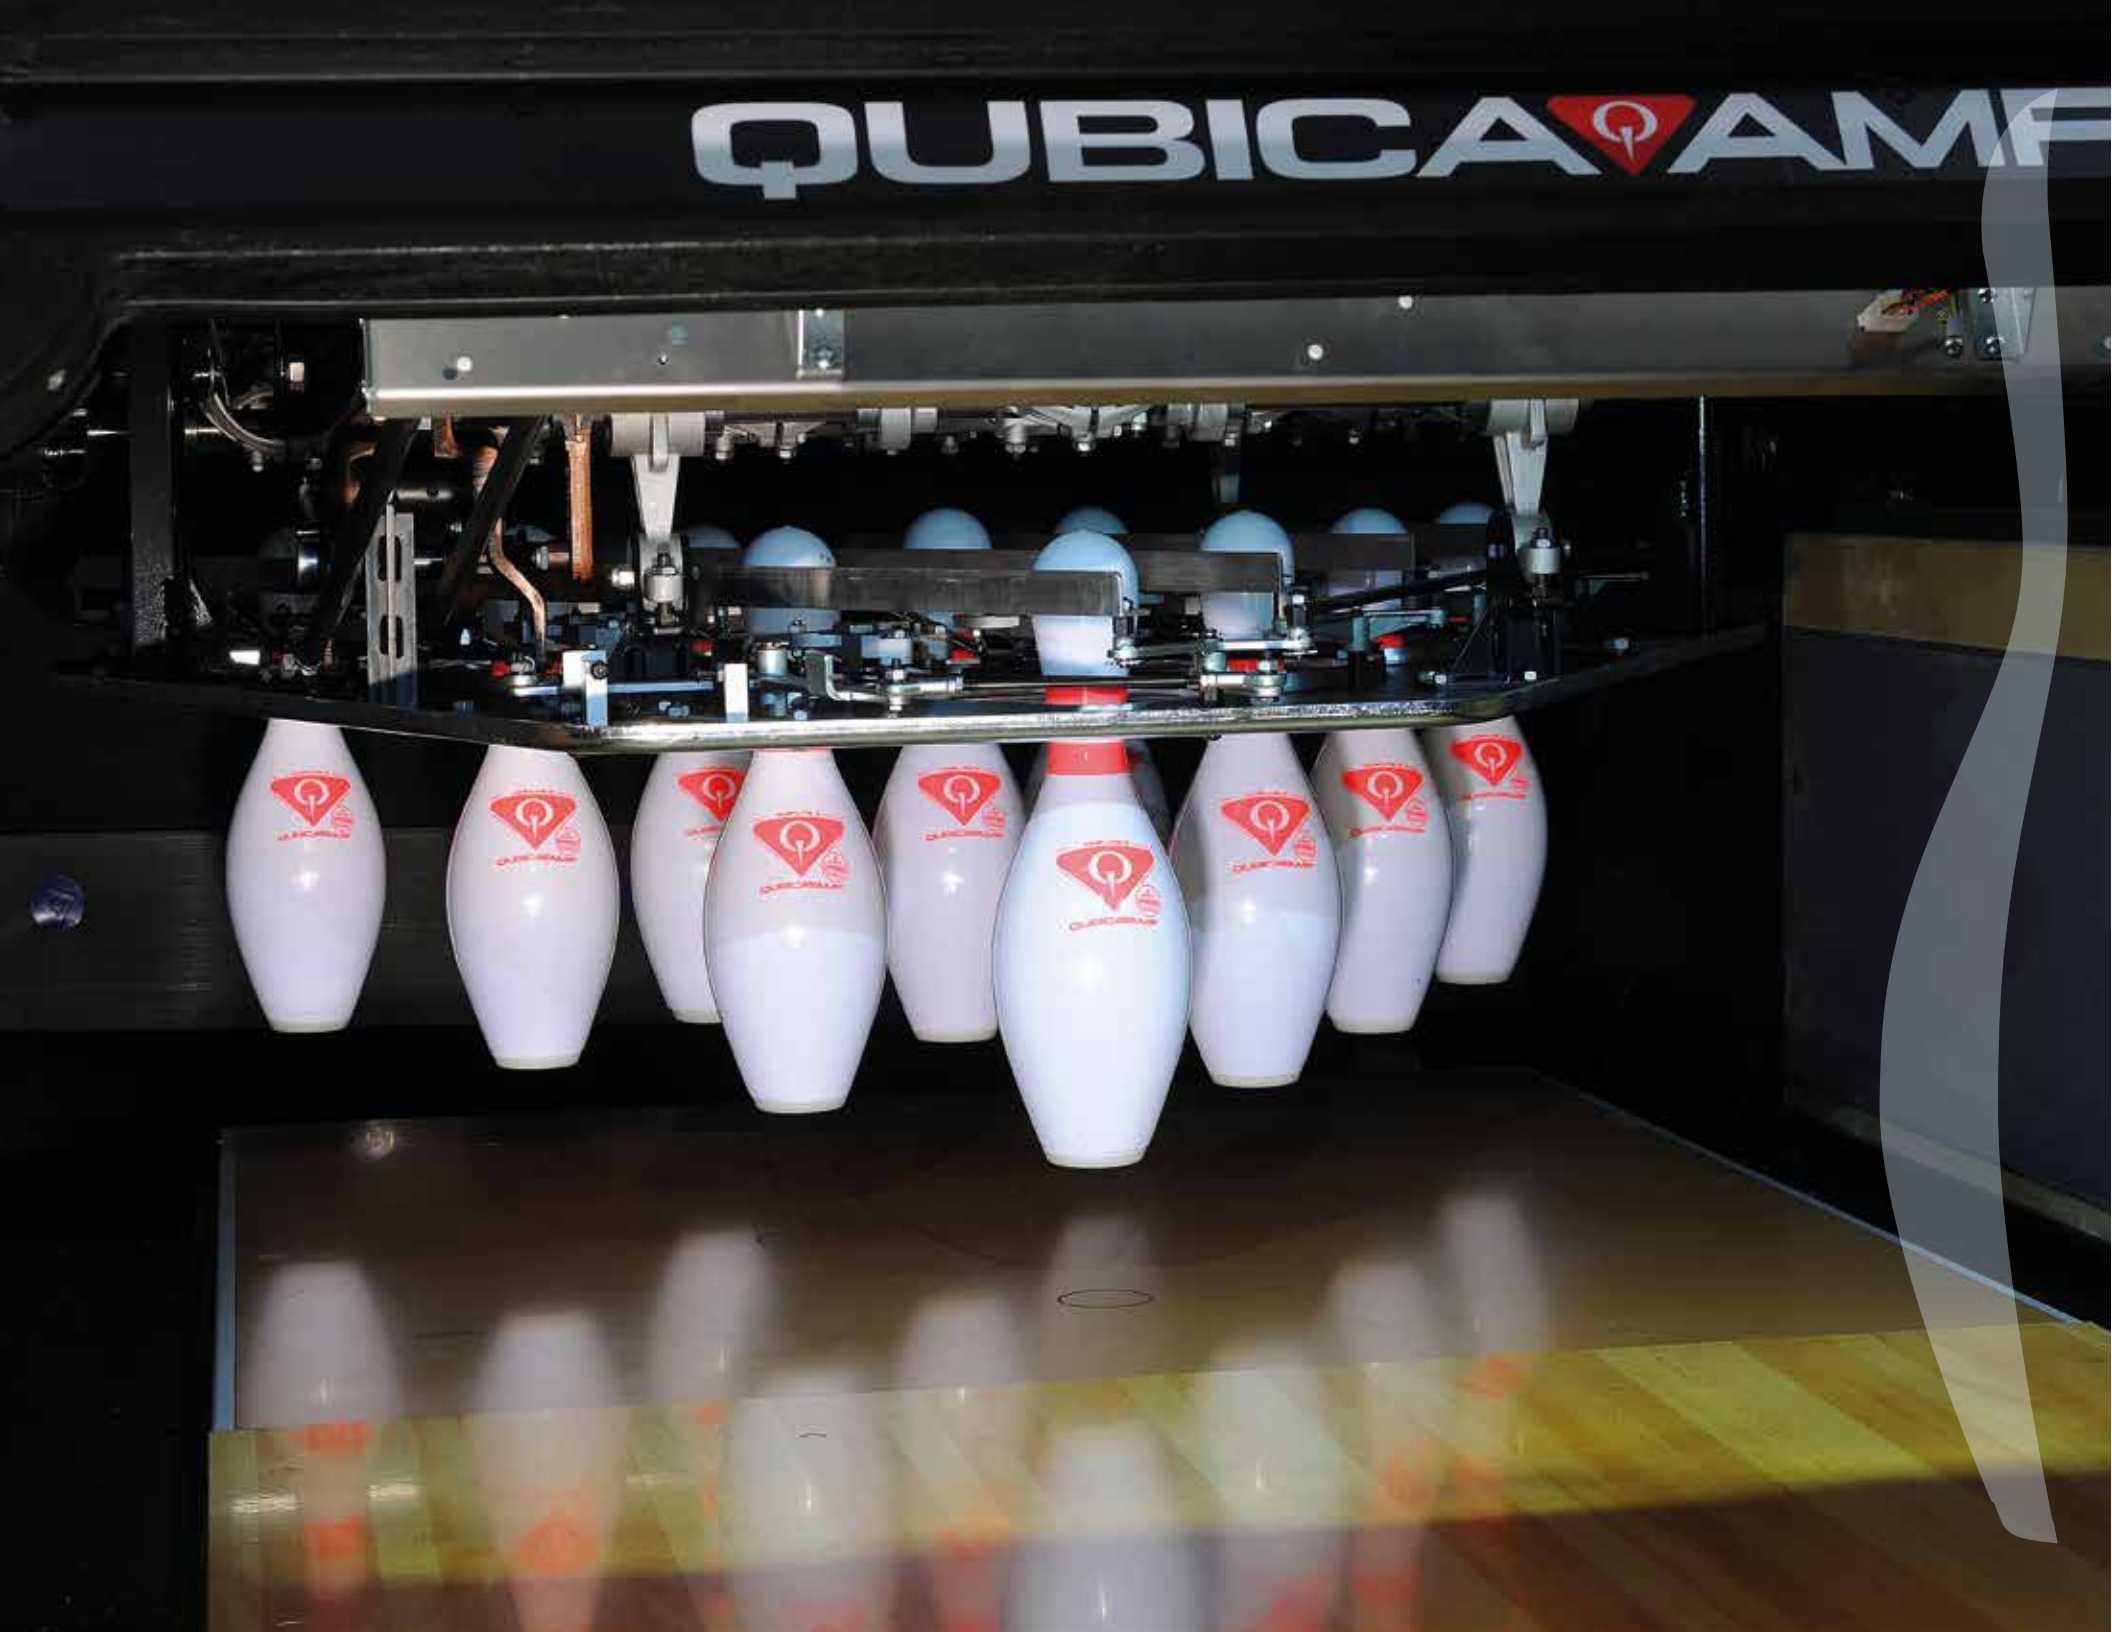

An approachable, uncluttered design provides safe and easy access to machine components for routine servicing.

REAL-TIME PERFORMANCE MONITORING²

Machine performance and staff intervention data is digitally captured and instantly viewable. Giving managers and technicians reliable insights into the bowling experience and staff utilization.

¹As standard, EDGE Free-Fall includes guarding. CE compliant guarding is included when sold in European Union countries.

²Functionality requires Conqueror X, any tier, with Conqueror Maximization Program (CMP).

EDGE FREE-FALL

smartest investment long term

A history of longevity and affordable operation have made QubicaAMF pinsetters the most sought-after in the business. EDGE Free-Fall carries our legacy forward through quality construction and unique technology that reduces operating costs. It will perform for decades—and cost you less to run.

Features & Advantages:

- ✓ SmartCycle®
- ✓ Run-On-Demand Intelligence
- ✓ Durabin® Pin Storage System
- ✓ Proven Design, Quality Construction

EDGE FREE-FALL

smartest investment long term

SMARTCYCLE®

Modern, precision scoring camera technology means the pin table does not cycle for every pin-leave situation. Eliminating unnecessary wear and tear and lowering parts and labor expenses.

RUN-ON-DEMAND INTELLIGENCE

All motors and mechanical systems run only when balls are thrown. Saving energy expenses and extending the life of components.

DURABIN® PIN STORAGE SYSTEM

This unique system stores bowling pins until time for them to be set on the pin deck. Pins last longer because they don't continuously cycle through the machine.

PROVEN DESIGN, QUALITY CONSTRUCTION

EDGE Free-Fall is the evolution of a time-tested design that has been proven to perform for generations. This exceptional machine is built with high quality metal alloys, resilient engineered thermoplastics and efficient industrial garmotors. EDGE Free-Fall will battle pro-level bowlers for decades—and win!
