## COLOR CONCEPTS

With the Harmony Line from QubicaAMF, it's never been easier to complement the style and atmosphere of your entire center with coordinating furniture, masking graphics and ball returns.

Investing in the color concept allows you to:

- give your center a value that will make the facility "come to life";
- choose the color(s) that is right for the each space;
- compensate for issues related to artificial lighting with the appropriate selection of colors.

And, you get all of these benefits with no incremental cost.

### **CHOOSE FROM 12 EXPERT COLOR CONCEPTS:**

Each "expert" color concept is a combination of different colors of Harmony furniture elements and hoods that delivers consonance and order, helping you to create the right look, whatever is the furniture layout that you envision for your center. Whether doing this project in-house or working with an architect or designer, there's a Harmony color combination to help you create just the right look—without starting from scratch.

Take advantage of our Color concepts and the job will be easier for you or any other facility design partners working with you.
