

CONQUEROR MAXIMIZATION **INSIDER**

SERVICE UPDATE:

Conqueror Kiosk...Imagine the Possibilities

Imagine your customers walking into your center and the first thing that catches their eye is your new Conqueror Kiosk. They walk over and begin to look at your offerings for the day. They choose their experience, add some food, and a lane is automatically opened for them. While they are heading down to their lane and selecting their house ball of choice, your front desk staff sees a new entry on the reservation board, so they open it and start gathering the sizes of rental shoes your guest requested from the kiosk. They hand the shoes off to one of your lane servers who bring them to the guests, introduce themselves, and offer any assistance they might need throughout their stay. Simultaneously your kitchen receives the food order as it prints from one of your remote printers and they begin cooking. With Conqueror Kiosk, this could be the new reality for your center and your guests. The Conqueror Kiosk provides a seamless addition to your centers services and offerings that integrates with all your other QubicaAMF products. The kiosk takes care of all the details leaving the staff to focus on what is really important—customer service and the guest experience.

The Conqueror Kiosk was designed to easily fit into your center's operations and is also easy and intuitive to setup for any experienced Conqueror user. If you are also Conqueror Web customer, you will have an advantage, as the Kiosk utilizes the same settings section of the QPortal.
