

# CONQUEROR MAXIMIZATION **INSIDER**

## Did you know?

Our teams have been working hard to integrate our infrastructures, tools, and processes. Aside from various business tools such as Dashboards and Reporting, Management and Configuration, and more, **QPortal** can be utilized as a central location for you and your staff. Based on staff roles, the management team can benefit from having access to game statistics, daily reports, transaction details, and other tools. The Performance Monitoring section of QPortal has been useful to mechanics, as well as managers. Front desk staff, lane attendants, and anyone who is utilizing any of the QubicaAMF products in your facility can benefit from having access to the Services & Resources section of QPortal as well. This section provides easy access to Training Resources, the Customer Portal, eShop, and other useful content related to the system and business operations. To learn more about QPortal, watch this [video](#).
