

CONQUEROR MAXIMIZATION **INSIDER**

QPortal

Conqueror X is built on an all-new platform with many resources and tools in the Conqueror Cloud. The QPortal is your window into this new Conqueror Cloud, providing instant access to information about things happening in your center, comprehensive tools to help run your center, and secure cloud backups to provide continuity and peace of mind for your center in case of disaster.

Whether you are in your center, at home, or on the road, the QPortal can instantly provide a variety of reports and information about your center. The Business Dashboard reports instant sales in several easy-to-read formats. Dynamic tools help you filter, view and even export the data you want, when you want it. The QPortal's Performance Monitoring displays all the data related to trouble calls and mechanical stops on your QubicaAMF Pinspotters, helping you plan for future maintenance and spot trends and issues before they become problematic. Other dashboards such as the Game Statistics dashboard and HyperBowling Bumper Protection Statistics provide meaningful, real-time data to help you manage your center.

QPortal is more than just reports and can be shared with more than just managers. The QPortal is also home to a variety of technical and training tools to help provide support for you and your staff. The Training Resources Library is a great tool to help you learn more about Conqueror X, QPortal, and even provides content on new modules and features as they're developed. Check out the "Cloud Services QPortal" video in the Resources Library for a 15-minute tour of the QPortal and what it can do for you and your staff, then check out the other videos. This video is a great detailed introduction to many of the features of QPortal outlined here and much more. After viewing the video, be sure to click through the library of Quick Reference Sheets and prerecorded webinars to learn how to take advantage of all the features in Conqueror X. These resources are even great for supplementing one-to-one training for new hires in a world where new employees are joining your team more often and employee turnover is higher than ever before.

The QPortal will continue to grow with new features and tools as part of the Conqueror Maximization Program and our commitment to developing the tools you want and need for your center. Settings and configuration for Conqueror Web and Conqueror Kiosk are all cloud based, allowing you to make

CONQUEROR MAXIMIZATION **INSIDER**

changes to your offers and promotions directly through the QPortal. As we continue to grow the QubicaAMF Ecosystem of products, the Conqueror Cloud and QPortal will be the hub for the information, configuration, and results you need to sell more, see more, and do more with Conqueror X and your Conqueror Maximization Program investment!
